AutoCAD is capable of generating HTML, PDF, and even PostScript versions of drawings, though this is sometimes considered an unofficial feature. AutoCAD is one of

the first CAD applications to incorporate an integrated drawing creation and revision tool. Revisions (drafts) of drawings can be made using the Revise feature. AutoCAD's Revise feature is similar to feature of the

free open-source
software

Inkscape.

AutoCAD is, for a
number of the
applications, one
of the industry's
first CAD software
applications for
the web, using
the.NET

Framework. The
Windows version

of AutoCAD LT,
included with
Windows Vista
and Windows 7, is
called AutoCAD.
The Windows
version of
AutoCAD 2011 is
called AutoCAD LT
(standalone), and
AutoCAD LT 2010
(standalone).
AutoCAD 2012

has been released for both Windows and Mac OS X.

The iOS version of AutoCAD is called AutoCAD Touch.

History In 1984, with the debut of the release of AutoCAD in 1984, it was the first computer-aided drafting software

for the Apple
Macintosh. A
version for the
IBM PC came out
in 1987. In 1987,
Intergraph
Corporation
purchased
Autodesk from the
founders, Ken and
Jim Hall, and
became the
company's sole

owner. Autodesk was headquartered in Mountain View, California and was a wholly owned subsidiary of Intergraph Corporation until 2000, when it was acquired by private equity firm Thomas H. Lee

Partners,
becoming a public
company. Since
that time,
Autodesk has
gone on to
become one of
the most
successful
software
companies in the
world. It is now
known as

AutoCAD, Inc. and is currently headquartered in San Rafael, California. In April 2011, the AutoCAD brand was extended to Mac OS X, Windows and iOS platforms. Draper Thomas & Associates was

founded by Dick Thomas and Bill Draper in 1983. Thomas and Draper were both engineers at Intergraph. Thomas and Draper were asked by the Intergraph marketing department to

develop a lower cost CAD program for Apple Macintosh computers. Bill Draper led the engineering team that developed the first version of Autodesk for the Macintosh. Thomas and Draper made a

deal with their friend, Bill Buzon, to form a startup company called Autodesk to sell this software. The deal was not a success and Autodesk did not formally exist. Autodesk Inc. was formed in 1989 with Thomas and

Draper as the
main shareholders

softwareQ: How to
clean string of
string with extra
characters?

Example: \$string
= 'orderId :

10,amount :
100.00,userID : 2';

Desired output:

'orderId:

10,amount:

100.00,userID: 2';

I tried `str_replace(`

`'orderId :',`

`'orderId:', $string)`

But it still outputs

the characters :

'orderId:

10,amount:

```
100.00,userID: 2';  
A: Try this code  
function removeSpecialCharacters(  
$s) { $s =  
trim($s); $s =  
str_replace(":", "",  
$s); return $s; }  
$s = 'orderId :  
10,amount :  
100.00,userID : 2';  
echo removeSpecialCharacters($s);
```

Output orderID:
10,amount:
100.00,userID: 2
