We'll share some helpful shortcuts, and show you more than 50 AutoCAD Keyboard Shortcuts. Here's our collection of 12 Quick Tips to improve your AutoCAD workflow. 1. Using the Bookmarks toolbar Open your favorite drawing by double-clicking on the file. Create a new bookmark. Double-click on the Bookmarks toolbar and type in the name of the drawing you'd like to use in future drawings. As you use the drawing, you'll want to toggle the visibility of the Bookmarks toolbar. Drag the cursor into the drawing and use your mouse buttons to toggle visibility. Go to the Bookmarks toolbar using the keyboard shortcut Ctrl + B and the shortcut key you defined above. 2. Use AutoCAD Units for more precision Want to know how much space is in an inch? What's the difference between feet and meters? When drafting, units are use to measure distances, areas and angles, and it's really important to know the differences between these units. To help you get more out of your AutoCAD drawings, it's a good idea to understand the differences between units. Use AutoCAD Units for your drafts. Measure the length of a bar using an inch and you'll find that the number doesn't match up with what you actually measured. AutoCAD units are accurate in the same way. If you're new to AutoCAD, you might want to start with AutoCAD units. When working with AutoCAD, you'll often find yourself having to measure or sketch in AutoCAD Units. Units are a standard measurement for areas, lengths, angles and more. They're used for everything from re-sizing your drawings to calculating the length of features. As you use your design software, you'll want to be familiar with AutoCAD units so you can check your

I'm a sucker for tax free junk :) Probably my biggest finds from Blowfish? A tin of M&Ms, a box of ketchup chips (I'm not sure how I feel about this. I liked the "original" ketchup chips and wouldn't mind the version with artificial sweetener, but the ketchup chips with the sprinkles are my favourite. I would never have known that they had sprinkles, but after trying them I would never go back to the original), and a box of raisin bran (I've seen in shops at Watsons, but they don't stock it at Blowfish so I can't buy it anymore!).Nike Air Force 1 Low – Design Borrowed The Nike Air Force 1 Low has been a favorite of mine for years. The high-top version may be slightly over-saturated, but the Low is one of the better-designed running shoe available. Like the Air Force 1, the Air Force 1 Low has the all-over geometric pattern, and also has the same design hardware and insole. The Air Force 1 Low is set to release in November, and retails for $120 USD.
