use : serial optional-serialized overrides of the scheduler's
internal reset behaviour. -- class is available on the
community edition of ocamlpro.
tournament.scheduler.pro.7.1.with.serial optional-
serialized overrides of the scheduler's internal reset
behaviour.8.9.10.std. -- class is available on the standard
edition of ocamlpro.2.3.4.5.6. in the figure below, the
scheduler selects two top-level ticks each time it runs. in
this case, the eventloopassemble task only takes 1/3 of
the time to execute. however, the first tick takes longer
to execute because the first task only runs sequentially,
whereas the second task runs in parallel. deprecated: use
